- System and process analysis
- IT management
- Excellent skills of banking technology

Language:

- English – intermediate
- Russian – native

Personal Information:

Russian native speaker, Moscow permanent resident Responsible, communicative, work well individually and in team, willing to travel a lot.

I am interested in research and experience with BPM, SOA and system integration. My main competences are in Business Processes, Solution and Technology Architecture areas. Being Business IT architect in Nordea means that You should have very broad perspective, you should know very well key concepts and functionality of different classes of software, be familiar with broad range of technologies, and know different patterns of system architecture and system integration. At the same time you should also have good insight into related subjects –security, hardware, infrastructure and networking and have sound understanding of business processes and functions.

Additional Information:

Driving license, foreign passport

Hobbies:

Hunting, travelling, astronomy.
